

► Web Services

More than just hosting data

- Simple and intuitive interface
- Reachable everywhere
- Quick sensor configuration using Wiji App
- Securing Data
- View your data in real-time
- Export data to csv, xls formats

Ijitrack allows you to generate alarms on level, overflow, battery voltage, unusual parameters, etc. For each alarm you can set a high and low threshold. Alarms are visible on V2.ijitrack.com and can be transmitted by mail, text message or fax.

Hosting and secure data at reduced price

Dashboard - History - Alarm management - Data export
