

EasyClean

Process Reliability Through Targeted Automation

EasyClean systems are feature-rich and compact. Chemical processing, food processing, bio-pharmaceutical processes, and other industrial applications all benefit from EasyClean's ability to automate routine maintenance. Just choose the most appropriate Ingold sensor, housing, and transmitter for your process, then add an EasyClean system to give you the exact amount of automation you need.

Flexibility of sensor maintenance
 In conjunction with the METTLER TOLEDO Ingold transmitter line, sensor maintenance is fully automated. However, manual operation is also possible whenever required. An integrated controller identifies each ongoing working step, as well as any functional problems within the system.

Safety
 EasyClean carries out continuous system diagnostics. In the event of any system anomaly the electrode remains inserted in the sample medium in order to ensure continued parameter measurement and prevent process interruption.

This section will assist you with configuration based upon your specific requirements. The following example creates a fully automated EasyClean system for a “typical” industrial processing application. For harsh chemical environments, choose a compatible industrial sensor housing combination and an EasyClean system to give you the level of automation desired. The ordering information provided on p. 131 will help you choose the appropriate system components. Please make sure you choose one item from each of the sections marked with a ▲.

Configuring your EasyClean system (example)

	Product Description	Order Number	P.
* EasyClean system	EasyClean 200 e	52 403 776	129
Option:	Empty canister (5000 ml)	52 118 063	–
Option:	Connection cable: control unit ▶ transmitter (5 m / 16.4 ft)	52 300 265	131
Option:	Wall mounting kit, complete	52 402 306	131
* Transmitter	M400 Type 1	30 374 111	84
* Sensor cable	VP cable 3 m (9.8 ft)	52 300 108	131
* Sensor	InPro 3250 SG / 225 mm	52 002 560	22
* Housing	InTrac 777 e-I	52 403 216	119

* Required system component for operation

Note: For full functionality, housings must have position sensors when used with an EasyClean 200 e or 400 system.

EasyClean 400

Flexible, for the Highest Demands

EasyClean 400 is used for fully automatic cleaning and calibration of pH measuring points. In combination with the transmitter M700 and the InTrac 7XXe retractable housing it provides a flexible system solution which can be implemented into either continuous or batch measurements. EasyClean 400 is versatile in its application. It offers multiple control possibilities and can be programmed extensively. Furthermore, a version for applications in explosion hazardous areas is available. The connection to a supervisory process control system can easily be realized in a conventional way, via PROFIBUS PA or via FOUNDATION fieldbus.

Specifications

Protection	IP 65/NEMA 4X
Power	Power supply via M700 Module EC 700 6.8V ($\pm 10\%$)/15 mA
Compressed air supply	4–10 bar (58–145 psi)
Flushing supply	2–6 bar (29–87 psi)
Pump	Delivery distance: 5 m/16.4 ft (10 m (32.8 ft) optional) Suction height: 1.5 m/4.9 ft

- **Completely unattended maintenance operation**
- **Allows maintenance teams to focus on more important and skill-intensive tasks**
- **Expanded operations without adding staff**
- **Ensured system performance and process control**

Features Overview

- Minimizes maintenance costs by fully automatic cleaning and calibration of the sensor
- Optimal adaptation to the process conditions thanks to diverse program runs with freely programmable sequences
- High flexibility thanks to free choice of individually programmable intervals or weekly programs
- EasyClean 400 ensures a safe application in explosion hazardous areas

EasyClean 200 e

Fully Automated Rinsing and Cleaning

The EasyClean 200e systems fully automate rinsing and cleaning procedures for the parameters pH, ORP, dissolved oxygen, CO₂, conductivity, and turbidity.

EasyClean 200e does not feature a calibration option, but it greatly reduces maintenance requirements and improves performance.

Specifications

Protection	IP 65
Power	100–230 VAC 50/60 Hz 0.18–0.3 A
Compressed air supply	4–8 bar (58–116 psi)
Flushing supply	2–8 bar (29–116 psi)
Pump	Delivery distance: 10 m (32.8 ft) Suction height: 3 m (9.8 ft)

Features Overview

- Modular configuration provides many installation options
- Many accessories available for customized installation and operational requirements

Other Highlights

- Configured for immediate operation
- Easily customized for special requirements
- Manual operation override if desired
- Fully automated operation for pH, ORP, dissolved oxygen, CO₂, conductivity, and turbidity
- Optimal cleaning effect due to the adjustable residence time

Schematic of a typical EasyClean 200e installation

EasyClean 150/100 Automated Rinsing

Schematic of a typical EasyClean 150 installation

Schematic of a typical EasyClean 100 installation

The EasyClean 100 and 150 series are designed to provide completely automatic sensor rinsing. The EasyClean 100 system is designed to be used with a stationary InDip housing with a spray-head for open tank and basin applications. The EasyClean 100 can use either water rinsing or compressed air to create turbulence to prevent stubborn build-up. The EasyClean 150 works in conjunction with a retractable housing to withdraw the electrode from the process prior to automatic water rinsing.

Specifications

Protection	IP 65
Power	100–230 VAC
	50/60 Hz
	0.18–0.3 A
Compressed air supply	4–8 bar (58–116 psig) (EasyClean 150)
Flushing supply	2–6 bar (29–87 psig)

Features Overview

- Modular design allows complete flexibility
- Universal components for easy serviceability
- Entry-level – moderate fouling environments

Other Highlights

- Simple design and fast setup
- Standard program for immediate operation
- Manual operation override if desired

EasyClean 100 cleaning action. The bubble formation centered beneath the sensor guarantees gentle cleaning.
